End-to-End UI Testing with Selenium Project Requirements

Minimum requirements

More than three items marked incomplete in this section will result in the project receiving a failing grade.

	Complete?
The project must be committed to a version control system (Git) with clear commit messages reflecting progress.	
Your backend must include at least **3 FastAPI routes**.	
You must include at least **1 test per route** using pytest (unit or integration).	
You must include at least **4 end-to-end Selenium tests**.	
The frontend must be a static HTML page that connects to your API and supports the UI flows being tested.	
Your Selenium tests must simulate realistic user interactions (ex: clicking, submitting forms, navigation).	
The application must run locally with clear setup instructions in the README.	

Code Convention and API Design Requirements

More than three items marked incomplete in this section will result in the project receiving a failing grade.

	Complete?
The code must be well-organized and modular, following FastAPI best practices.	
Error messages should be clear and informative, guiding users to correct their input.	
Code should be free of commented-out blocks or unused imports.	
Files and functions should be appropriately named, with consistent formatting and indentation.	
The test suite should be logically organized, with meaningful test names and grouped by test type.	

README requirements

More than three items marked incomplete in this section will result in the project receiving a failing grade.

	Complete?
The app's name.	
A brief description of your app and its functionality.	
A ***Getting started*** section. This section should include instructions on how to interact with your app.	
A **Technologies Used** section listing major frameworks and libraries such as Selenium, pytest, frontend style libraries, etc...	
If necessary, an ***Attributions*** section. This section should include links to any external resources (such as libraries or assets) you used to develop your application that require attribution. You can exclude this section if it does not apply to your application.	

Summary

Project meets minimum requirements and passes.
